ADASTRA DQ Meter

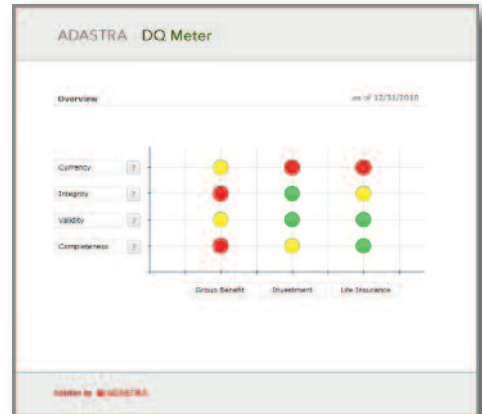

Accelerate the adoption of robust Data Quality processes at your organization by leveraging Adastra DQ Meter, a proven Data Quality measurement and dashboard solution framework that integrates seamlessly with your infrastructure.

Using the latest Data Quality tools available, Adastra DQ Meter leverages pre-built templates to measure and monitor the quality of your data against your organization's metrics and KPIs. Reports are delivered using pre-built dashboards that integrate with your existing Business Intelligence reporting tools.

Adastra DQ Meter is equipped with pre-built dashboards to help you effectively manage your Data Quality Management function.

DQ Status

See the status of the quality of your data in multiple departments or divisions at a glance according to your corporate DQ metrics and KPIs.

DQ Trending

Is your data quality improving or declining? Find out where your focus should be and see the effects of your data quality initiatives.

Designed to work with any Data Quality rules-based engine, database, Business Intelligence tool, and data source, Adastra DQ Meter is an essential tool for accelerating the effectiveness of your Data Quality program. Adastra DQ Meter reduces your costs by giving you the power to measure your quality and continuously improve it, thereby avoiding the cost of reaction-based solutions.

Drill Down

With just a click you can see exactly which business rule is being violated and assess the business impact so that you can effectively address the issue.
